

Additions and Corrections

2003, Volume 22

Rajeswari M. Kasi and E. Bryan Coughlin*: Supported Constrained-Geometry Catalysts on Cross-Linked (Aminomethyl)polystyrene: Studies of Ethylene and 1-Octene Polymerizations.

Page 1357. The calculated values of the activities ($\text{kg}/((\text{mol of Ti}) \text{ h (atm of C}_2^-))$) for the production of polyolefin reported in Table 1, column 4, entries 1–4, are incorrect. We thank Prof. Christopher W. Jones of Georgia Institute of Technology for bringing the errors to our attention.

The correct activity values for Table 1 are shown here.

Table 1

entry	activity (corrected values) ($\text{kg}/((\text{mol of Ti}) \text{ h (atm of C}_2^-))$)
1	4.13
2	1.2
3	10.1
4	0.8
